

INSULA ALBA

Resort & Spa

Local community policy

INSULA ALBA Resort & Spa is committed to helping and preserving traditions and values of our local community and contribute to the development of local businesses. For this reason, we have developed a policy to communicate with local people and local businesses on all aspects of our company so that we can harmonize our relationships, in order to have a sustainable and mutually profitable relationship. Our hotel first examines local businesses for market products and generally prefers locally produced products in all aspects of its activities. The hotel uses the procedure of reverse osmosis for the used water, in order to minimize any environmental impact. Also, as for the promotion of local businesses, we only propose to our clients local car rental companies, and other local mini-markets and restaurants.
